Work Experience

Pharmaceutical Cosmetic LLC

Front-end Developer

Full-time, Feb 2023 — Present

Responsibilities:
- Full technical development and optimization for company websites, including analysis, tech stack selection, and implementation.
- Support, refactoring, and adding new features to the company's existing projects.
- Integration of projects with external systems via APIs
- UX/UI design, including planning and enhancing user experience based on web analytics data.
- Collaborated with cross-functional teams, including marketing, content and sale team.

Achievements:

- Migrated the main website to Nuxt + Headless WordPress, improving page loading speed 3x and boosting SEO rankings.
- Developed a new cosmetics brand website with dynamic marketing page capabilities.
- Transitioned a training event landing page from graphical site builder to Astro framework, achieving a 2x speed improvement on mobile devices and ability to control versions via Git.
- Designed a unified design style for online projects, ensuring consistency and scalability.

Tech stack: Vue 3, Nuxt, SSR, Vite, TypeScript, JavaScript, Git, Github Actions, Astro, WordPress, Webpack, REST API, Tailwind CSS, Sass, GSAP, vee-validate, Zod, nodemailer, nodeJS, PM2, Figma
